HANDLING OF EMPTY FREIGHT CARS TO SHOP FACILITIES

-

A. A charge of \$400.00 per car will apply each way on movements of empty railcars from interchange tracks to shop facilities or from shop facilities to interchange tracks on the INRD.

1. This charge does not apply if INRD receives line haul revenue prior to or after placement to shop facilities.
2. No switching charges are included in this charge; any switching will be in addition to this charge.
3. This charge will be assessed against the car owner or the party ordering the car to shop, unless INRD is provided with written instructions requesting otherwise.

B. If an empty railcar is not ordered placed to the shop within 48 hours after notification that the railcar is available for placement OR if an empty railcar is returned to INRD for holding after placement to the shop facility, it will be subject to a holding charge of \$75.00 per car for placement to INRD tracks and holding charges of \$30.00 per car per day, or fraction thereof, until railcar is ordered placed to the shop or released for interchange. These charges are in addition to any handling charges above.

1. These charges are limited to a maximum of 50 railcars held on INRD. Any railcars held by INRD in excess of 50 will be assessed a charge of \$60.00 per car per day effective 24 hours after notification that the railcar is available for placement OR if an empty railcar is returned to INRD for holding after placement to the shop facility.
2. If railcars are ordered by specific car number a charge of \$25.00 per car will be assessed in addition to the rates above.
3. These charges will be assessed against the shop facility.

This item applies on all types of rail cars, including, but not limited to, cars provided by railroads, leased cars and cars bearing other than railroad reporting marks, but not including passenger train cars.

A shop facility is defined as a facility that performs cleaning, lining, relining, maintenance, repair or rebuilding of railcars.
